Carson City Redevelopment Authority
Explanation of Assessed Valuation Calculation
For the Budget Year Ending June 30, 2020

The Redevelopment Authority's assessed value for FY 2020 is 6,838,065 higher than the amount provided on the Department of Taxation's FY 2020 Final Assessed Value by County report. This is due to the fact that the Carson City Assessor uses the District Method to report the assessed value for the Redevelopment Districts on the segregation report, but the actual allocation of tax collections to the Redevelopment Districts is done using the Parcel Method.

The main difference between the two methods occurs when there are parcels in the district that have dropped in net assessed value to less than their base value. Using the District Method, these parcels are averaged against the other parcels in the district which lowers the Redevelopment percentage of assessed value. Using the Parcel Method, these parcels are not considered in the calculation resulting in a higher percentage of assessed value allocated to Redevelopment.

83 parcels in the Redevelopment Districts have assessed values which are less than their base assessed values.

The Assessor's calculation (district method) takes the total assessed value of all the parcels in the Redevelopment Districts then subtracts the total base value of the parcels to come up with the 94,237,066 incremental assessed value. The parcel method, treats any parcel whose current assessed value is less than its base value as not being part of the Redevelopment District. This results in the incremental assessed value of 101,075,131.
